

National Preparations towards the Operation of the European Visa Information System (VIS)

IBPC 2012, NIST, Gaithersburg

06.03.2012, Fares Rahmun

VIS Promotion Video of EU Commission

VIS Overview

Federal Foreign Office

• Visa Application

Federal Police

• Border Control

• Territory Control

• Border Visa

ABHn

BAMF

Police

Secr. Service

- Search
- ID – Check
- Extension
- Shortening
- etc.

Start of Operation:
October 11th 2011

EU VIS

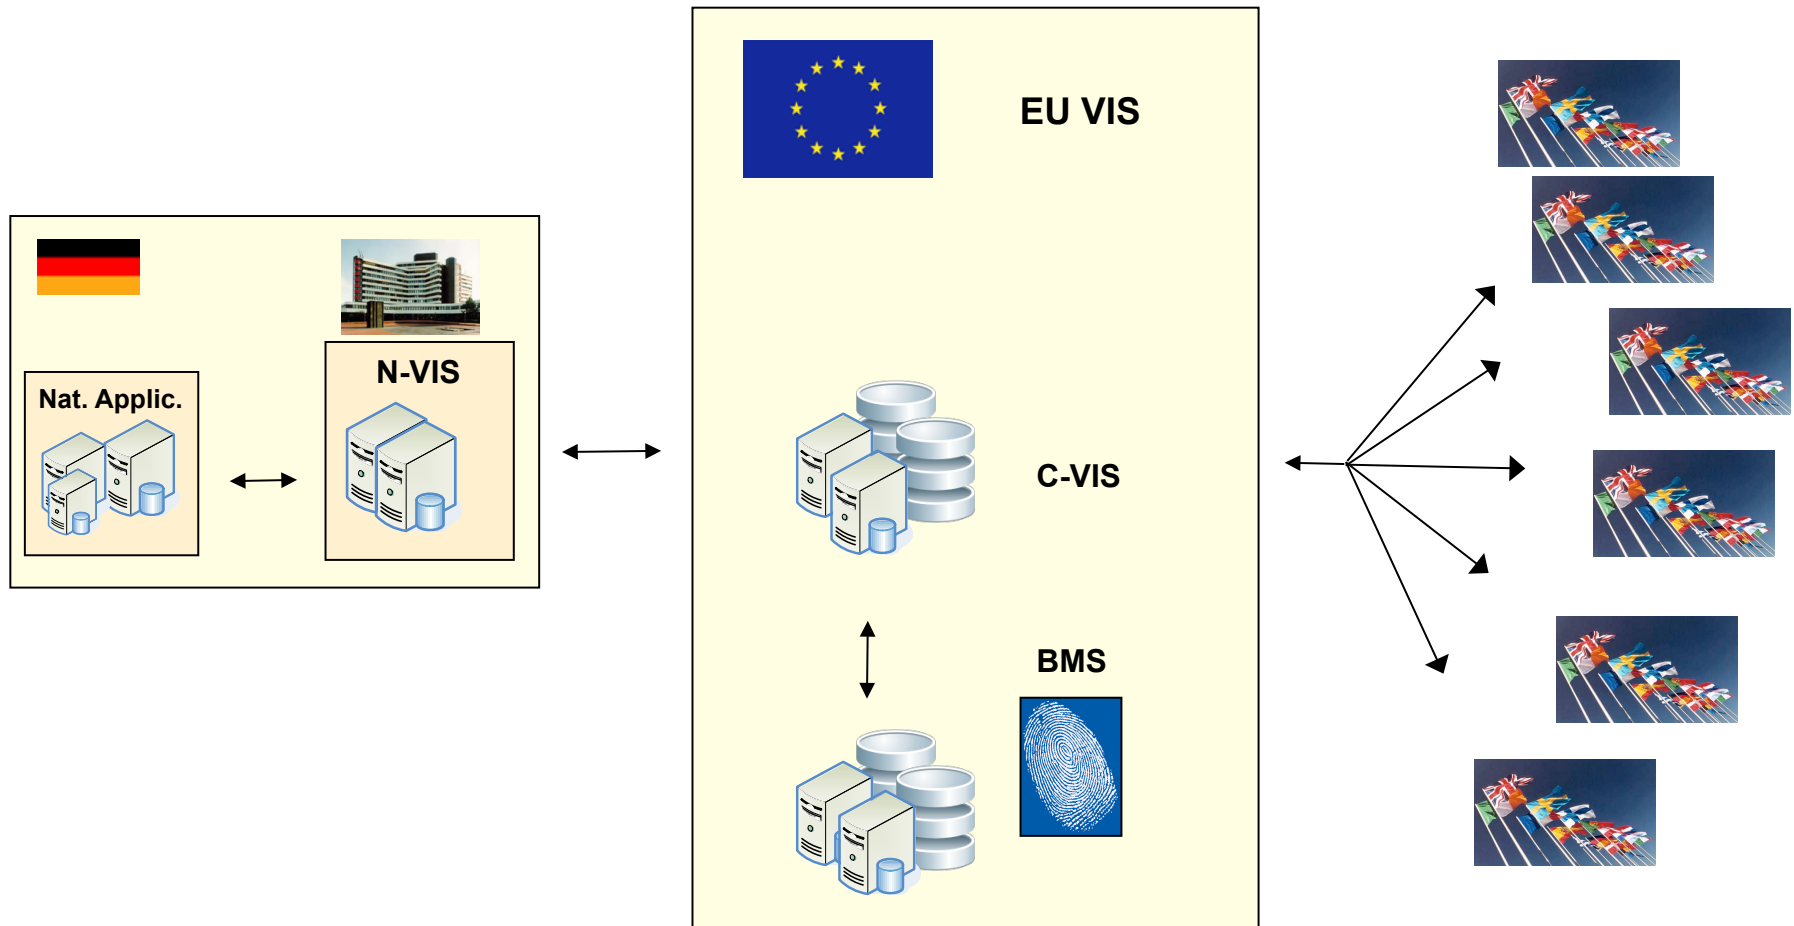

Federal Office of Administration (BVA)

- Searching
- Linking
- On basis of alphanumeric and fingerprint search
- Highly Automated
- Human operators
- supported by Facial Recognition

VIS Overview

Regional Rollout

- **Regional Rollout** regarding **Enrolment** (2010/49/EG)
 - Region 1: „**North Africa**“ – Egypt, Algeria, Lybia, Mauritania, Morocco, Tunisia → **October 11th 2011**
 - Region 2: „**Near East**“ – Israel, Jordan, Lebanon, Syria → **May 5th 2012**
 - Region 3: „**Gulf Region**“ – Afghanistan, Bahrain, Iran, Iraq, Yemen, Katar, Kuwait, Oman, Saudi Arabia, VAE → **October 2nd, 2012**

- **Schengen Border Code:**
Regulation (EC) No 81/2009 amending Regulation (EC) No 562/2006 as regards the use of the VIS under the Schengen Borders Code
- Border Posts need to check at least by „*using the number of the visa sticker*“. After 3 years of operation: usage of fingerprints mandatory
- State: usage of biometric verification increasing

German Federal Police – Individual Implementation

Border Control – Primary • Verification 1:1

Border Control – Territory • Verification 1:1 (mainly – others possible)

**Federal Office of
Administration (BVA)**

EU VIS

German Federal Police – BVA Implementation

Border Control – Secondary

- Verification 1:1, Search 1:n

Border – Visa Enrolment

- Enrolment, Linking, Search 1:n

Federal Office of Administration (BVA)

EU VIS

Pilot Projects

■ BioDEVII (2007 - 2010):

- European Pilot Project (8 participating member states)
 - Enrolment, Verification and Identification **with focus on fingerprints**
 - Organizational consequences for consulates and border posts
 - Interoperability & compliance with international standards
- Main Experiences in the field of **fingerprint enrolment / quality of biometrics**
- Presentation at IBPC 2010

VIS PILOT Setting

- **Project “VIS PILOT” – (2011)**
Cooperation
 - German Federal Police (BPOL)
 - Federal Office of Administration (BVA)
 - Federal Office for Information Security (BSI)
 - Secunet (Contractor)
- Complete Setting of 1st and 2nd border position

BUNDESPOLIZEI

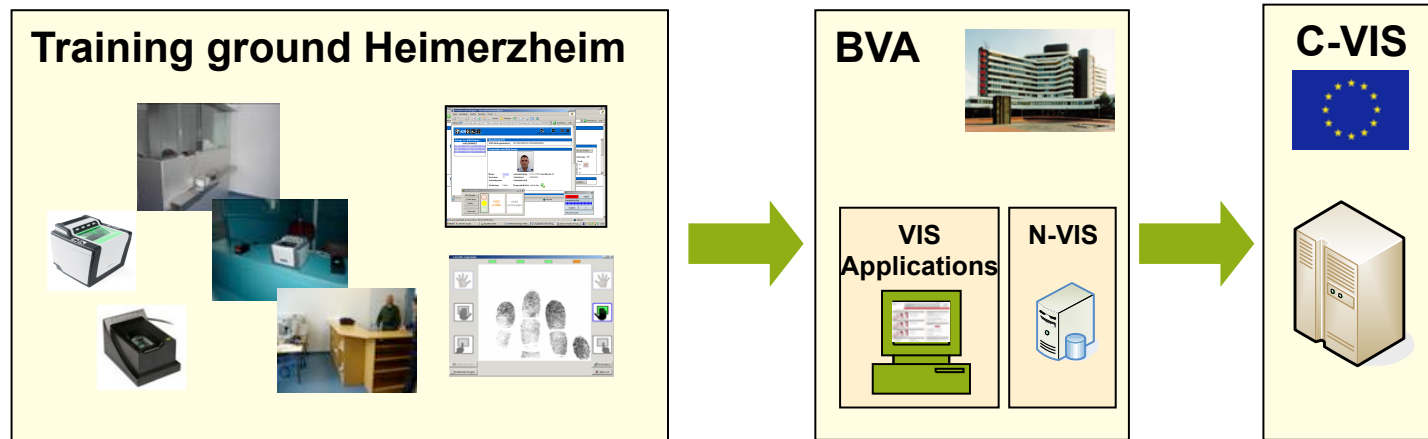

Bundesverwaltungsamt

Bundesamt
für Sicherheit in der
Informationstechnik

secunet

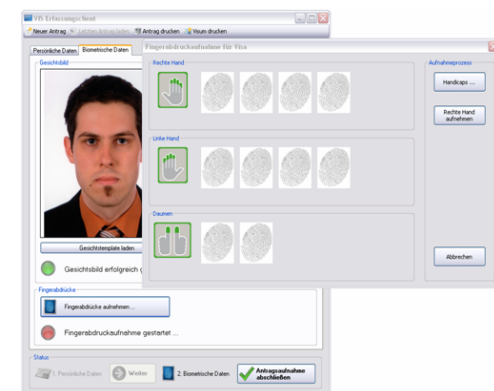

VIS PILOT Setting

■ Voluntary Participation

- Signed Declaration of Consent
→ Data Protection

■ Enrolment

- ~ 200 Police Staff
- Basic Alphanumeric Data
- Fingerprints (Crossmatch Guardian)
- Photo (webcam or scanner or foto cabin)
- Printing of “real” visasticker

VIS PILOT Setting

- **Simulation of 1st position (02/03 2011)**
1:1 verification with number of visa sticker
- **Usage of 1-finger and 4-finger scanner**
 - Dermalog ZF1 / L SCAN Guardian
 - Comparison: Ease of use, performance
- **Border Control Simulations**
 - 1 Step - 2 Step Approach
 - 1 finger – 4 finger scanner
 - Usage of Permutation
 - Simulation of Identity Frauds
 - Simulation of Fake-Finger-Attack
 - Optimization of Implementation
 - Enduser Feedback (Police Staff)
 - Biometric performance tests
 -

VIS PILOT Setting

■ Simulation of 2nd position

- Biometric enrolment with 4-finger scanner
- Verification (1:1)
- Identification (1:n)
- Issuing of Border visa
- Software Training
- Discussions about organizational process

Personalien des Antrags DEU/503000/20101004/000000058

	Name	SINGH
	Vorname	ALI
	Geburtsname	
	Geschlecht	M
	Staatsang.Eheg./LP	
	VISA-Dateinummer	V110404500068
	Fingerabdrücke	vorhanden

Sachverhalte und weitere Informationen

[Visum](#) | [Erweiterte Personenangaben](#) | [Ausweis](#) | [Reisedaten](#) | [Antragsteller](#)

VIS PILOT Simulations

■ Simulations of error and identity fraud scenarios

- Attempt to enter with wrong visa or passport
 - Attempt to enter with „faked fingers“
 - Handling or errors or questionable results of the system
 - Analysis and reviewing of biometric results
 - Interviews with active police staff
-
- Not necessarily scientific, but important end user feedback, to
 - **optimise software implementations** (ergonomics)
 - **design organisational processes**

VIS PILOT Lessons Learned

Training Material & Training Video for Border & Consulates including

- **Legal Background**
- **Maintenance Instructions** (counter layout, calibration, cleaning etc.)
- **FAQ regarding biometrics** (quality assessment, tricks & tools etc.)
- **Process** (workflow, possible protection against fakes etc.)

Border Issues – Time

Additional time needed – 1st position / primary (Airport)

- Provided measurement: Starting after having found the visa sticker in the passport, End: result received
- Searching the visasticker in passport will add another 10 seconds (estimated)
- Measurement valid if no „complications“ arise

BMS Options

Permutation (2.203 Repetitive Verification Flag) :

- **Normal:** Matching of Live-FP with the exact reference in stored record (e.g. left index finger \leftrightarrow left index finger)
- **Option Repetitive Verification:**
If case „Normal“ results in a **NO HIT**, LIVE-FP will be verified also against remaining fingers in stored record
- No relevant time difference has been measured
- Reduction of False Rejection because of placing the wrong hand / finger at the border
- Negative: Increased risk of False Acceptance
- Recommendation: **Usage of Permutation**

Biometrics - Statistics

MS	OK	NOK	FTE	ERR	% ERR
AT					
BE

Total					

- Europe in „Biometrics Competition“
- Central statistics enable abstract monitoring, for example:
- Monitoring of **FTE – Rate**
- Monitoring of **Error Rate**
 - „Wrong“ NIST file (type of transaction etc.)
 - Duplicates etc.
- Differences between MS

■ Possible Reasons

- During aquisition
 - Software Issues?
 - Training Issues?
- Problem of Threshold?

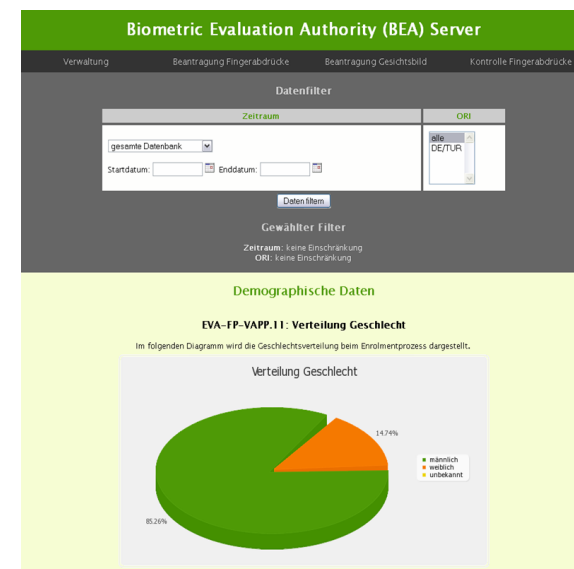

Biometric Evaluation Authority

Biometric Evaluation Authority (BEA)

BSI Technical Guideline - TR-03121

- Monitoring quality / support error analysis
- Evaluation-Server developed as Proof-of-Concept in VIS PILOT
- Creation of diagrams and statistics regarding biometric processes
 - enrolment, verification, identification
- Reading and evaluating biometric BSP logging data
- Useful information, that can only be **collected during acquisition at client side!**

Technical Guideline Biometrics for Public Sector Applications
